

EduManage Pro

Complete School ERP System

USER MANUAL & COMPLETE GUIDE

Version	1.0
Platform	PHP 8.x / MySQL / Apache
Roles Covered	Admin, Teacher, Student, Secretary
Pages	Full reference — all 68 system files

Excellence Secondary School
Powered by EduManage Pro

TABLE OF CONTENTS

1. System Overview	What EduManage Pro does
2. Installation & Setup	Getting started from scratch
3. Default Login Credentials	All usernames and passwords
4. Admin Dashboard	Main control centre
5. Student Management	Add, edit, search students
6. Teacher Management	Teachers, subjects, assignments
7. Class & Subject Setup	Organise classes and subjects
8. Results & Grading	Enter and view academic results
9. Attendance Tracking	Mark and report attendance
10. Announcements	School-wide notices
11. Assignments	Post and grade assignments
12. Messaging System	Internal communication
13. Timetable	Weekly schedule management
14. Payments & Fees	Record and track fee payments
15. Analytics Dashboard	School-wide performance charts
16. Report Cards	Generate and print report cards
17. WhatsApp Integration	Message parents via WhatsApp
18. Bulk Import	Import students/teachers via CSV
19. Backup & Restore	Database backup and recovery
20. System Settings	Configure grades, sessions, users
21. Student Promotions	Promote or retain students
22. Multiple Admins	Create additional admin accounts
23. Notifications	In-system notification centre
24. Documents	Upload study materials
25. Troubleshooting	Common errors and fixes

1. SYSTEM OVERVIEW

EduManage Pro is a complete web-based School ERP (Enterprise Resource Planning) system built with PHP and MySQL. It manages every aspect of school operations — from student enrolment to fee collection, results entry to WhatsApp parent notifications — all in one place.

What EduManage Pro Can Do

- Manage students, teachers, classes and subjects
- Record and publish academic results with automatic grade calculation
- Track daily attendance for all students
- Manage and collect school fees with receipt generation
- Send WhatsApp messages to parents — free, no API cost
- Generate printable report cards with school logo and signatures
- Post school announcements to students, teachers or parents
- Internal messaging between all staff and students
- Visual weekly timetable editor
- Bulk import students and teachers from CSV files
- Full database backup and restore system
- Analytics dashboard with charts and performance trends
- Audit log of every action performed in the system
- Student promotion system at end of each academic session

System Architecture

Language	PHP 8.x (no framework — clean, modular)
Database	MySQL 5.7+ / MariaDB 10.3+
Web Server	Apache (XAMPP/WAMP/LAMP) or Nginx
Frontend	Pure HTML, CSS, Vanilla JavaScript — no React/Vue required
File Size	Under 2MB total (very lightweight)
Browser	Chrome, Firefox, Edge, Safari — any modern browser

2. INSTALLATION & SETUP

Step-by-Step Installation

Step 1	Install XAMPP (Windows) or LAMP (Linux) on your computer or server.
--------	---

Step 2	Copy all EduManage Pro files into your web root folder. Example: C:\xampp\htdocs\edumanager\ on Windows, or /var/www/html/edumanager/ on Linux.
Step 3	Open phpMyAdmin (usually at http://localhost/phpmyadmin) and create a new database named edumanager_pro.
Step 4	Import the file database_FIXED.sql into the edumanager_pro database using phpMyAdmin Import tab.
Step 5	Open config/db.php and set your database credentials (DB_USER and DB_PASS).
Step 6	Open config/config.php and set BASE_URL to match your installation path. Example: http://localhost/edumanager
Step 7	Visit http://localhost/edumanager/fix_passwords.php in your browser. This hashes all passwords. The page will confirm success.
Step 8	DELETE fix_passwords.php from your server immediately after running it. This is important for security.
Step 9	Go to http://localhost/edumanager/login.php and log in with admin / admin123

■ Always delete fix_passwords.php after running it. Leaving it on your server is a security risk.

Folder Permissions

The following folders must be writable by your web server (chmod 755 on Linux):

- uploads/logos/
- uploads/photos/
- uploads/assignments/
- uploads/documents/
- exports/

✓ On Windows/XAMPP these folders are automatically writable. On Linux run: `chmod -R 755 uploads/ exports/`

3. DEFAULT LOGIN CREDENTIALS

These are the default accounts created when you import the database. Change all passwords after your first login.

Role	Username	Password	Access Level
Admin	admin	admin123	Full access to everything
Teacher	TCH001	teacher123	Results, attendance, assignments
Teacher	TCH002	teacher123	Results, attendance, assignments
Teacher	TCH003	teacher123	Results, attendance, assignments

Student	STU001	student123	View own results, fees, timetable
Student	STU002	student123	View own results, fees, timetable
Secretary	sec001	sec123	Fee management only

■ *Change all default passwords immediately after installation. Go to Settings → Users tab → Reset Password for each user.*

How the Login System Works

- After logging in, the system automatically redirects each user to their role-specific dashboard.
- Admin → admin/dashboard.php
- Teacher → teacher/dashboard.php
- Student → student/dashboard.php
- Secretary → secretary/dashboard.php
- Sessions expire after inactivity. Users are redirected to login with a "session expired" message.
- Wrong password attempts have a 1-second delay to slow down brute force attacks.
- There is no self-service password reset — only admins can reset passwords.

4. ADMIN DASHBOARD

The admin dashboard is the main control centre. It shows real-time statistics about the school.

Dashboard Statistics Shown

- Total active students, broken down by gender
- Total active teachers
- Number of classes and subjects
- Fee collection rate for current term
- Average academic score across all classes
- Recent activity feed (last 5 logins, payments, results)
- Quick links to common actions
- Unread messages and notification count

Admin Sidebar Navigation

Menu Item	Purpose
Dashboard	Overview stats and quick links
Students	Full student management
Teachers	Teacher profiles and subject assignments
Classes	Manage class groups

Subjects	Manage school subjects
Results	View and enter academic results
Attendance	View and mark attendance
Assignments	Create and grade assignments
Messages	Internal messaging + broadcast
Timetable	Visual weekly schedule editor
Payments	Fee management and receipts
Analytics	Charts and performance reports
Report Cards	Generate printable report cards
WhatsApp	Send parent notifications
Bulk Import	CSV upload for students/teachers
Announcements	Post school notices
Documents	Upload study materials
Audit Logs	Full activity trail
Backup	Database backup and restore
Settings	Configure the entire system
Promotions	Promote students to next class
Notifications	In-system notification centre
Profile	Change own password and info

5. STUDENT MANAGEMENT

Adding a New Student

- Go to Admin → Students → click "+ Add Student"
- Fill in: Full Name, Student ID (or leave blank to auto-generate), Gender, Date of Birth
- Select the Class and current Academic Session
- Enter Parent Name, Parent Phone 1, and Parent Phone 2 (both phones are required for WhatsApp)
- Optionally add address, blood group, and medical notes
- Click Save — the student is enrolled immediately

Editing a Student

- Go to Students list → click the  edit icon next to the student

- Update any field and click Save
- You can also change the student's class (for manual class changes outside promotion season)

Searching for Students

- Use the search bar at the top of the Students page
- Search by name, student ID, parent name, or phone number
- Results update in real-time as you type (AJAX search)
- Filter by class, session, or status using the dropdowns

Student Statuses

Active	Currently enrolled and attending
Inactive	Enrolled but not attending (e.g. suspended)
Graduated	Completed schooling — set during Promotions
Transferred	Moved to another school — set during Promotions

✓ Each student can have a login account. Their username is their Student ID (e.g. STU001) and initial password is student123.

6. TEACHER MANAGEMENT

Adding a Teacher

- Go to Admin → Teachers → click "+ Add Teacher"
- Enter Full Name, Teacher Code (e.g. TCH010), qualification, and contact details
- A user account is automatically created — the teacher logs in with their Teacher Code
- Default password for new teachers is changeme123 — they should change it via Profile

Assigning Subjects to Teachers

- Go to Admin → Teachers → click "■ Subjects" next to the teacher
- Select which subjects they teach and in which classes
- Example: TCH001 teaches Mathematics in SS1, SS2 and SS3
- Teachers can only enter results for subjects they are assigned to

Teacher Dashboard Features

- See results entry progress for each of their assigned subjects
- View upcoming assignment due dates
- Check unread messages from students or admin
- Quick links to enter results and mark attendance

7. CLASS & SUBJECT SETUP

Managing Classes

- Go to Admin → Classes to add, edit or delete class groups
- Default classes: JSS1, JSS2, JSS3, SS1, SS2, SS3
- Each class has a sort order — controls how they appear in dropdowns
- You can rename classes to match your school (e.g. Grade 7, Form 1, Year 9)

Managing Subjects

- Go to Admin → Subjects to add new subjects
- Each subject has a name and an optional short code (e.g. MTH, ENG)
- Subjects are used across results, assignments, timetable, and teacher assignments

Linking Subjects to Classes

- Go to Admin → Classes → click "Subjects" for a class
- Tick which subjects are offered in that class
- This controls which subjects appear when entering results for that class

8. RESULTS & GRADING

How Scoring Works

Every result has three components. The total is calculated automatically:

Test Score	Continuous assessment test (default max: 20)
Assignment Score	Homework/assignment mark (default max: 20)
Exam Score	End of term examination (default max: 60)
Total Score	Auto-calculated: Test + Assignment + Exam = /100
Grade	Auto-assigned based on your grade ranges in Settings

Entering Results — Admin/Teacher

- Go to Results → click "+ Enter Results" or "Bulk Entry"
- Select the class, subject and term
- For single entry: choose a student and enter their three scores
- For bulk entry: all students in the class appear in a table — fill in scores row by row
- Grades are calculated and displayed in real time as you type
- Click Save All to save the entire class at once

Grade Configuration

Default grade ranges (configurable in Settings → Grading tab):

Role	Username	Password	Access Level
A	80–100	Excellent	4.0 points
B	70–79	Very Good	3.0 points
C	60–69	Good	2.0 points
D	50–59	Pass	1.0 points
F	0–49	Fail	0.0 points

✓ To change grade ranges: go to Settings → Grading tab → edit the rows → Save. You can add more grades (e.g. A+, B-) or remove grades as needed.

Student View of Results

- Students log in and go to My Results
- They see all their subjects, scores, grades and teacher comments
- They can filter by term to see results from previous terms
- They can generate their own report card from the My Report Card page

9. ATTENDANCE TRACKING

Marking Attendance — Teacher

- Go to Attendance → select the class and date
- All students in the class are listed
- For each student select: Present, Absent, or Late
- Add an optional note (e.g. "called in sick", "family emergency")
- Click Save Attendance — it is recorded immediately
- You can go back and edit attendance for a past date by selecting that date

Attendance Reports — Admin

- Admin can view attendance for any class, any date range, any term
- Filter by student to see individual attendance history
- The Analytics dashboard shows attendance rate per class as a bar chart
- Students and parents can view attendance via the student portal

Attendance Rates

80% and above	Good attendance — shown in green
60%–79%	Average — shown in amber/yellow
Below 60%	Poor attendance — shown in red and triggers alert

✓ Use WhatsApp Integration → "Attendance Alert" to send automatic messages to parents of students with 3 or more absences this term.

10. ANNOUNCEMENTS

Posting an Announcement

- Go to Admin → Announcements → click "+ New Announcement"
- Enter a title and the full message body
- Set the priority: High (urgent), Normal, or Low
- Set the audience: All, Students only, Teachers only, or Parents
- Optionally set an expiry date — the announcement disappears after that date
- Click Post — it appears immediately on the relevant dashboards

Who Sees Announcements

- All students see announcements targeted to "Students" or "All"
- All teachers see announcements targeted to "Teachers" or "All"
- Students portal shows announcements on their dashboard and Announcements page
- High priority announcements appear with a red banner

11. ASSIGNMENTS

Creating an Assignment — Admin or Teacher

- Go to Assignments → click "+ Create Assignment"
- Enter the title, description/instructions, select class and subject
- Set the due date and maximum score (default 20)
- Optionally attach a file (PDF, Word, image) for students to download
- Click Create — students in that class are notified automatically

Grading Submissions

- Go to Assignments → click "Submissions" on any assignment
- See all students who submitted, their file/comment, and submission time
- Enter a score for each submission and click Grade
- Students can see their score on their Assignments page

Student Assignment Portal

- Students see their assignments split into three sections:
- Pending — not yet submitted, due date shown with countdown
- Submitted — shows their file, date submitted, and grade when marked
- Overdue — missed assignments shown in red as a warning
- Students click "Submit Assignment" to upload a file or leave a text comment

12. MESSAGING SYSTEM

How the Messaging System Works

- All roles can send and receive messages — admin, teacher, student, secretary
- Every user has an inbox and a sent folder
- Messages are grouped into conversation threads (same subject, same two users)
- Read messages are automatically deleted after 24 hours to save storage
- Unread messages are NEVER automatically deleted
- Admin can send a Broadcast message to all users at once

Composing a Message

- Click the "Compose Message" button or the "New Message" button in the sidebar
- Recipients are grouped by role: Administrators, Teachers, Students, Secretaries
- Type a subject and message body
- Click Send — the recipient gets an in-system notification
- Students can message teachers, admin, or other students

Reading Messages

- Click any message in your inbox to open the full conversation thread
- All replies between you and the other person on the same subject appear together
- Type a reply at the bottom of the thread and click Send
- A blue dot next to a message means it is unread
- Unread messages appear at the top of your inbox

Admin Broadcast

- Only admins can send broadcasts
- Click "Send Broadcast" in the left sidebar
- The message is delivered to every active user in the system simultaneously
- Broadcasts appear in every user's inbox

■ Read messages auto-delete after 24 hours. If a student says they cannot find a message, check if it was read more than 24 hours ago. Use announcements for important information that needs to persist longer.

13. TIMETABLE

Setting Up the Timetable — Admin Only

- Go to Admin → Timetable and select a class from the dropdown
- The weekly grid shows Monday–Friday with 8 periods
- Click any empty cell to add a subject to that slot
- Select the subject, teacher, start time and end time
- Tick "Mark as Break" to set that slot as a break period (e.g. 9:10–9:30 Break)
- Click Save Slot — the cell updates immediately without a page reload
- To clear a slot, click on it and click "Clear Slot"
- Use "Clear All" button to wipe the entire timetable for that class

Viewing the Timetable

- Admin and teachers can view any class timetable
- Students see only their own class timetable (locked automatically)
- Click the "Print" button for a print-ready version
- The print view hides all navigation and buttons automatically

14. PAYMENTS & FEES

Recording a Payment

- Go to Payments → click "+ Record Payment"
- Select the student from the dropdown
- Choose the term and fee type (School Fees, Exam Fees, Sports Levy, etc.)
- Enter Amount Due (total fee for that term) and Amount Paid (what they paid today)
- Select payment method: Cash, Bank Transfer, Mobile Money, Cheque, or Online
- Enter Receipt No. if you have an official receipt number
- The balance is calculated automatically and shown in real time
- Click Save — the payment is recorded and the student is notified

Payment Statuses

Paid	Amount paid = Amount due — shown in green
Partial	Some payment made but balance remains — shown in yellow
Unpaid	No payment recorded yet — shown in red

Sending Fee Reminders via WhatsApp

- In the Payments table, each row with an outstanding balance has a green WhatsApp button
- Clicking it opens WhatsApp Web with a pre-written fee reminder to the parent
- The message includes the student's name, outstanding balance, and term
- No API cost — uses the free wa.me link method

Printing a Receipt

- In the Payments table, click the  receipt icon next to any payment
- A formatted receipt opens in a new tab with school logo, student info, and payment details
- Click "Print Receipt" or use Ctrl+P / Cmd+P
- The print view hides all buttons automatically
- Students can also view and print their own receipts from the student portal

CSV Export

- Click "Export CSV" at the top of the Payments page
- Downloads a spreadsheet with all payment records for the current filter
- Useful for sending to the school accountant or for external reports

15. ANALYTICS DASHBOARD

The analytics dashboard gives a complete overview of school performance. It is only visible to admins.

What the Analytics Dashboard Shows

- Total students, teachers, classes — top KPI cards
- Fee collection rate — how much of total fees have been paid (progress bar)
- Students per class — horizontal bar chart
- Grade distribution — how many students got A, B, C, D, F this term
- Subject performance — average score per subject with colour coding
- Attendance rate per class — bar chart
- Top 10 students — leaderboard with gold, silver, bronze medals
- Fee collection by class — which classes have paid and which are behind
- 14-day attendance trend — daily bar chart showing attendance rate per day
- Average score per class — bar chart comparing academic performance across classes

✓ Use the print button to print the analytics report for school board meetings or parent-teacher evenings.

16. REPORT CARDS

Generating a Report Card — Admin

- Go to Admin → Report Cards
- Select a student from the dropdown

- Select the term (First, Second, or Third)
- The report card generates instantly on screen
- Click "Print Report Card" or use Ctrl+P
- Save as PDF from your browser's print dialog

What the Report Card Shows

- School name, logo, address and motto at the top
- Student name, ID, class, gender, session and term
- Table of all subjects with test, assignment, exam, total scores and grade
- Teacher name for each subject
- Overall average score and grade
- Class position (1st, 2nd, 3rd, etc.)
- Attendance summary for the term (days present out of total)
- Fee payment status
- Teacher comments per subject
- Grade scale key
- Signature lines for class teacher and principal
- Optional: principal's signature image (upload in Settings)

Student Report Card Portal

- Students can view and print their own report cards by logging in
- Go to My Report Card in the student menu
- They can select the term and print directly from their browser
- Report card is identical to the admin-generated version

Setting Up School Logo and Principal Signature

- Go to Settings → School tab
- Upload School Logo — appears on report cards and payment receipts
- Upload Principal Signature — appears on report cards (PNG with transparent background recommended)
- Click Save Settings

17. WHATSAPP INTEGRATION

How WhatsApp Integration Works

EduManage Pro uses the free wa.me link method — no WhatsApp Business API, no monthly fees, no registration required. Clicking a button opens WhatsApp with a pre-written message that you can send in one tap.

Available Message Templates

Fee Reminder	Tells parent their ward has an outstanding fee balance
--------------	--

Fee Paid Confirmation	Confirms that fees have been fully paid for the term
Results Available	Notifies parent that term results are ready to view
Attendance Alert	Alerts parent about their child's absence days this term
Exam Reminder	Reminds parent that end-of-term exams are approaching
Custom Message	Write your own message — typed once, sent to all selected students

Sending WhatsApp Messages

- Go to Admin → WhatsApp
- Select the message type from the left panel
- Optionally filter by class to see only that class's students
- A preview of the message appears in a WhatsApp-style bubble on the right
- The table shows each student with two WhatsApp buttons — one for each parent phone
- Click the button — WhatsApp Web or the WhatsApp app opens with the message pre-filled
- Press Send in WhatsApp — done!
- For custom messages, type your message and click "Update Preview" first

■ Each message requires a separate click. There is no bulk-send automation — WhatsApp does not allow automated sending without an approved Business API.

✓ Use the "Select Qualifying" button in Promotions to find students to message. Use the class filter in WhatsApp to target specific classes.

18. BULK IMPORT

Importing Students from CSV

- Go to Admin → Bulk Import
- Select "Students" as the import type
- Select a default class (used for students whose CSV row has no class column)
- Click "Download Template" to get the correct CSV format
- Fill in the template with your student data in Excel or Google Sheets
- Save as .csv format
- Drag and drop or click to upload the file
- A preview table appears — check the data looks correct
- Click "Confirm Import" to import all rows
- Duplicates are skipped automatically — you get a report of what was skipped

CSV Column Format — Students

Name	Full name of the student (required)
Gender	Male or Female (required)

Class	Class name exactly as in system e.g. SS1 (optional if default class set)
Parent Phone 1	Parent's first phone number — digits only e.g. 2207000001 (required)
Parent Phone 2	Parent's second phone number — digits only (required)
Parent Name	Name of parent or guardian (optional)
Date of Birth	Format: YYYY-MM-DD e.g. 2008-03-15 (optional)
Student ID	Your own ID — leave blank to auto-generate (optional)

Importing Teachers from CSV

- Select "Teachers" as the import type
- Download the teacher template and fill it in
- Required columns: Full Name
- Optional: Teacher Code, Email, Phone, Qualification
- All imported teachers get default password: changeme123
- They must change their password on first login via Profile → Change Password

■ *Maximum file size: 5MB. Maximum recommended rows per import: 500. For larger imports, split into multiple files.*

19. BACKUP & RESTORE

Creating a Backup

- Go to Admin → Backup
- Click "Download Backup (.sql)"
- A complete SQL file of your entire database downloads immediately
- No command line or shell access required — it is pure PHP
- The backup includes ALL tables: students, results, payments, settings, users, everything
- Store the backup file in a safe location (not on the same server)
- Create backups regularly — before term ends, before importing data, before any major change

Restoring from a Backup

- Go to Admin → Backup → or Admin → Restore
- WARNING: Restoring overwrites ALL current data permanently
- A pre-restore backup is automatically created before any restore proceeds
- Tick the confirmation checkbox to confirm you understand the risk
- Select your .sql backup file
- Click "Restore Database Now"
- The system executes all SQL statements and reports how many succeeded

■ *DANGER: Restore permanently overwrites all current data. Only restore if something went seriously wrong. Always keep at least one recent backup before restoring.*

20. SYSTEM SETTINGS

Go to Admin → Settings. The settings page has 5 tabs.

Tab 1: School

- School Name — appears on all reports, receipts, and the login page
- School Address — shown on receipts and report cards
- School Phone and Email — contact details on official documents
- School Motto — shown on the login page and report cards
- Class Label — change "Class" to "Grade", "Year", "Form" to match your school
- Currency Code and Symbol — e.g. GMD / D for Gambian Dalasi
- Test Max Score, Assignment Max Score, Exam Max Score — these control the scoring grid
- School Logo — upload PNG or JPG, appears on report cards and receipts
- Principal Signature — upload a signature image for report cards

Tab 2: Grading

- Shows all grade ranges in an editable table
- Change the min and max scores for each grade
- Change the remark text (e.g. "Excellent", "Very Good")
- Add new grades with the "+ Add Grade" button
- Remove grades by clicking the X button
- Click Save Grade Ranges — takes effect immediately for all future result calculations

Tab 3: Session & Term — HOW TO CHANGE TERM

- This is where you change the CURRENT session and term
- Go to Settings → click the "Session & Term" tab
- In the "Set Current Session & Term" card, use the dropdowns to select the active session and term
- Click "Save Session/Term" — the entire system now uses the new term
- All results, attendance, payments will now be recorded under the new term
- To create a new academic session (e.g. 2025/2026), use the "Create New Session" card
- Type the session name (e.g. 2025/2026) and click Create — three terms are created automatically

■ *Always change the current term at the start of each new term. This ensures results, attendance and fees are recorded in the correct term.*

Tab 4: Users

- Shows all user accounts in the system
- Displays: username, full name, role, status, last login
- Click "Reset Password" to set a new password for any user
- No email required — it is an admin-controlled reset
- You can see when each user last logged in

Tab 5: API

- Lists all available API endpoints for developers
- All endpoints return JSON
- Authentication via session cookie is required
- Useful for building integrations with other school systems

21. STUDENT PROMOTIONS

At the end of each academic session, use the Promotions system to move students to the next class.

Bulk Promotion — Entire Class

- Go to Admin → Promotions
- Select the class you want to promote (e.g. SS1)
- A table appears with all students, their average scores, and a recommendation
- Students with average score above 50% are pre-selected for promotion
- Students below 50% are pre-selected as not qualifying — you can override this
- Click "Select Qualifying" to auto-tick all students who meet the pass threshold
- Manually tick/untick individual students as needed
- Select the "Promote to Class" (e.g. SS2) and the target session (e.g. 2025/2026)
- Click "Promote Selected Students"
- All ticked students are moved to SS2 in the 2025/2026 session

Individual Student Actions

- Promote — move to a specific class in a specific session
- Retain — keep in same class, move to new session (student repeats the class)
- Graduate — marks student as graduated (for final year students)
- Transfer — marks student as transferred to another school

Promotion History

Every promotion action is logged in the Promotion History table at the bottom of the page. It shows who was promoted, when, by whom, from which class to which class, and any notes.

22. MULTIPLE ADMINS

Yes — EduManage Pro fully supports multiple admin accounts. There is no limit on the number of admins.

Method 1: Via Settings (Recommended)

- Go to Settings → Users tab
- You will see all existing users

- Currently there is no "Add User" button in the UI — use Method 2 below or the SQL method
- To reset an existing user's password: click "Reset Password" next to their name

Method 2: Via the Database (Recommended for New Admins)

Run this SQL in phpMyAdmin to create a new admin account:

```
INSERT INTO users (username, password, role_id, full_name, email, status)
VALUES ('admin2', 'PLAIN:yourpassword', 1, 'Second Admin Name', 'admin2@school.edu', 'active')
;
```

- After inserting, visit http://localhost/edumanage/fix_passwords.php to hash the password
- OR: manually update the password hash using PHP's `password_hash()` function
- The new admin can log in immediately with username admin2 and their password
- All admins have identical full access to the system

Role IDs

Role	Username	Password	Access Level
1	admin	Full access	role_id = 1
2	teacher	Academic only	role_id = 2
3	student	Read-only portal	role_id = 3
4	secretary	Payments only	role_id = 4

✓ To create a second admin quickly via SQL, set `role_id = 1`. For a secretary, set `role_id = 4`. Passwords starting with PLAIN: will be hashed when you visit [fix_passwords.php](http://localhost/edumanage/fix_passwords.php).

23. NOTIFICATIONS

How Notifications Work

- Notifications are sent automatically when key events happen
- A student gets a notification when a new result is posted for them
- A student gets a notification when a new assignment is created for their class
- A user gets a notification when they receive a new message
- A student gets a notification when their payment is recorded
- Admin gets a notification when a new payment is received

Viewing Notifications

- Click the bell icon (🔔) in the top navigation bar to see unread notifications
- The bell shows a red badge with the unread count
- Click "View All" to go to the full Notifications page
- On the Notifications page you can mark individual notifications as read

- Or click "Mark All Read" to clear all at once
- Delete individual notifications or "Clear All" to clean up

24. DOCUMENTS

Uploading Study Materials

- Go to Admin → Documents or Teacher → (same page)
- Click "+ Upload Document"
- Enter a title and optional description
- Select which subject and class the document is for (optional — leave blank for all)
- Upload the file: PDF, Word (.doc/.docx), Excel, PowerPoint, or image — max 5MB
- Click Upload — the document is available immediately

Accessing Documents

- All users can browse and download documents
- Filter by class or subject using the dropdowns
- Use the search bar to find documents by title
- Click "Download" to open the file
- Only admin and the teacher who uploaded can delete a document

25. TROUBLESHOOTING

Common Errors and Solutions

Problem: Cannot log in with admin / admin123

Solution: You need to run fix_passwords.php first. Visit http://localhost/edumanage/fix_passwords.php in your browser. If that does not work, the database was not imported correctly. Re-import database_FIXED.sql and try again.

Problem: Duplicate column error on teachers.php or results.php

Solution: Download the fixed teachers.php and results.php files provided and replace the ones in your admin/ folder. The original files used SELECT * which caused column name conflicts.

Problem: PHP error: unparenthesized ternary on timetable.php line 45

Solution: Download the fixed timetable.php file and replace it. This was a PHP 8 compatibility issue now resolved.

Problem: Settings tabs are not clickable

Solution: Download the fixed settings.php file and replace it. The tab switching JavaScript has been rewritten and now works correctly.

Problem: documents.php or profile.php gives 404

Solution: These files were missing from the original batch. Download documents.php and profile.php from the gap-fill files and place them in your admin/ folder.

Problem: Messages disappear after being read

Solution: Download the rewritten messages.php. The new version only auto-deletes read messages after 24 hours. Unread messages are never deleted.

Problem: Students cannot compose messages

Solution: Same fix as above — download the rewritten messages.php. The compose modal now works for all roles.

Problem: Images or uploads not working

Solution: Check that the uploads/ folder and its subfolders (logos, photos, assignments, documents) exist and are writable. On Linux: `chmod -R 755 uploads/`

Problem: White screen or no output

Solution: Enable PHP error display by adding to the top of index.php: `ini_set("display_errors",1); error_reporting(E_ALL);` This will show what the actual error is.

Problem: Database connection failed

Solution: Open config/db.php and verify DB_HOST, DB_NAME, DB_USER, and DB_PASS are correct. Default for XAMPP: host=localhost, user=root, pass=(empty).

Problem: BASE_URL links are broken

Solution: Open config/config.php and set BASE_URL to match exactly how you access the site in the browser. Example: `http://localhost/edumanage` — no trailing slash.

Problem: Session expires too quickly

Solution: Open config/config.php and increase SESSION_LIFETIME from 7200 (2 hours) to a larger value like 28800 (8 hours).

Getting Support

- Check this README first — most common issues are covered above
- Check the Audit Logs (Admin → Audit Logs) for a trail of what happened
- Check your web server error logs: in XAMPP these are at `xampp/apache/logs/error.log`
- For PHP errors, check the error.log file in your web server logs folder

QUICK REFERENCE — ALL LOGIN CREDENTIALS

Role	Username	Password	Access Level
Admin	admin	admin123	Full system access — change immediately
Teacher 1	TCH001	teacher123	Results, attendance, assignments, messages
Teacher 2	TCH002	teacher123	Results, attendance, assignments, messages
Teacher 3	TCH003	teacher123	Results, attendance, assignments, messages
Student 1	STU001	student123	View results, fees, timetable, messages
Student 2	STU002	student123	View results, fees, timetable, messages
Secretary	sec001	sec123	Fee management and payment receipts only

QUICK REFERENCE — KEY PAGES

Task	How to do it
Login	http://localhost/edumanage/login.php
Admin Dashboard	http://localhost/edumanage/admin/dashboard.php
Change Term/Session	Settings → Session & Term tab → Save
Add Student	Students → + Add Student
Enter Results	Results → Bulk Entry → select class and subject
Print Report Card	Report Cards → select student → Print
Send WhatsApp	WhatsApp → select type → click parent button
Create Backup	Backup → Download Backup
Reset Password	Settings → Users tab → Reset Password
Create New Admin	phpMyAdmin SQL → INSERT with role_id=1 → fix_passwords.php
Fix Passwords	http://localhost/edumanage/fix_passwords.php
